

AN ENTREPRENEURIAL COMMUNITY

BIOSCIENCES AT THE NIIC

Connected Health Lab

The NIIC fosters new opportunities and relationships in digital health. Our programs and infrastructure connect entrepreneurs, business builders, corporations, and innovative groups with resources, tools, and networks. These all contribute to develop ideas into inventive products, new businesses, and expanded markets.

Connected Health Gaming & Experience Lab

Gamified user interfaces, Virtual Reality (VR), and Augmented Reality (AR) are the next wave of digital engagement leading to better user experiences and technology adoption. The NIIC's Gaming & Experience Lab was established to teach developers and companies how to use these user immersive tools.

Dedicated Biosciences Wing

Our north wing is designed for companies focused on innovation in healthcare and the biosciences. Available spaces include wet and dry research labs with university-grade fume hoods. A shared biomedical equipment room includes autoclave, -80° freezer, bottle washer, and other specialized equipment.

Additional Biosciences Wing Amenities

- 13 furnished office suites for teams (650 to 1,300 sq. ft.)
- 11 furnished executive office suites (100 to 150 sq. ft.)
- Secure access by proximity card
- State-of-the-art IT infrastructure
- Backup generators with ten-second delay
- Top-ranked entrepreneurial resources
